Section Listing by Accident Rate	Page	99
Accident Summary by Federal Aid Route	Page	149
Accident Summary by County	Page	152

INTRODUCTION

This report presents traffic accident data for 1961, 1962 and 1963 on the rural sections of Montana's Primary and Interstate Highway Systems. It is based on all accidents occurring on these systems that were reported to the Highway Patrol during the three-year period.

Montana statutes require that accidents must be reported to the Montana Highway Patrol if 100 dollars or more of property damage is involved or if they are the cause of an injury or death. Penalties are provided in the law for not reporting these accidents within a reasonable length of time.

The fatality rate per hundred million vehicle-miles of travel, as well as the total accident rate per million vehicle-miles of travel, have been computed for each year of the three-year period, 1961-1963. Property damage losses have been obtained from the estimates shown on the accident reports. Total economic loss has been computed by adding the National Safety Council's estimate of costs of deaths and injuries to the reported property damage. This National estimate of economic loss for 1963 was $1900 for each injury and $33,300 for each death on our highways.

The first section of the report lists pertinent accident data by Highway Patrol section on each Federal Aid Route. The second section of the report lists each Highway Patrol section in descending order by accident rate per million vehicle-miles of travel. An accident summary of each Federal Aid Route as well as a summary by County are listed in the back of the report.

The tabulation on the following page is a Statewide summary of each item listed in the report.

ITEM	STATEWIDE SUMMARY 1961	1962	1963
Section Length in miles and tenths (Rural constructed mileage - Primary & Interstate Systems)	5,730.7	5,760.6	5,762.6
Average Daily Traffic Volume	839	891	883
Number of Property Damage Accidents	2,869	3,421	3,142
Number of Injury Accidents	1,305	1,108	1,332
Number of Fatal Accidents	134	147	138
Total Number of Accidents	4,308	4,676	4,612
Number of Persons Injured	2,046	1,872	2,123
Number of Persons Killed	177	177	170
Amount of property damage as reported to Highway Patrol	$3,189,310	$3,685,601	$3,291,958
Total economic loss based on the National Safety Council's estimate of the cost of deaths and injuries added to the reported property damage.	$12,345,310	$12,537,103	$12,986,658
Accident rate - expressed as the total number of accidents of all types per million vehicle-miles of travel.	2.5	2.5	2.5
Fatality rate - expressed as the total number of deaths per hundred million vehicle-miles of travel.	10.1	9.4	9.2

The State map on Plate 1 shows the location of all sections of highway having an accident rate above the State average of 2.5 in 1963. About 199 miles of highway shown in red have an accident rate of more than double the State average. Sections shown in green, totaling 2,200 miles, have an accident rate of from 2.6 to 5.0. Sections at or below the State average of 2.5 accidents per million vehicle-miles of travel total 3,364 miles and are shown on the map by means of an open band.

The following tabulation compares the accident and fatality rates on the Interstate and Primary Systems for 1963.

	Miles	Ave. Daily Traffic	Number of Accidents	Number of Fatalities	Accident Rate	Fatality Rate
Interstate System	1,191.8	1,601	1,566	67	2.2	9.6
Primary System	4,570.8	695	3,046	103	2.6	8.9
TOTAL	5,762.6	883	4,612	170	2.5	9.2
